

Remote Monitoring Quick Start Guide

START HERE

Hardware Setup

1. Plug the included Network cable into the LAN port on your recorder. Connect the other end of the cable to an open port on your router.

2. Connect the NVR to a display. Choose video display option **2A** or **2B**:

- 2A)** Plug the included HDMI cable into the back of your recorder. Connect the other end of the HDMI cable to a TV.

- 2B)** Plug a VGA cable (not included) into the back of your recorder. Connect the other end of the VGA cable to monitor (19" or larger).

3. Plug the mouse into the USB port in the back of the NVR. If your model has two USB ports, either one will work.

4. Plug your power supply into the back of your recorder. Plug the power supply or power cable into a surge protector. **Turn on the Power Switch (if present).**

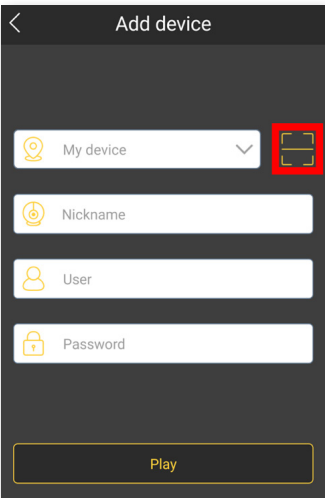

Mobile Setup

Remote monitoring can be achieved on both Android and iOS phones. Following are the steps to setup remote monitoring on a mobile phone.

1. Download the Q-See QT View app from the App Store or Google Play.

2. Once the download is complete open the app. You may skip any tutorials. Select the **QR Code Scanner** icon.

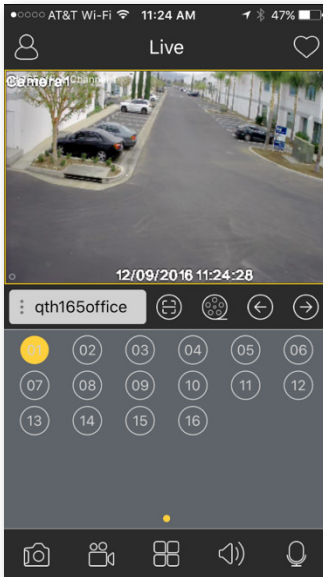

3. Scan the QR code on the top panel of your system.

4. Enter the **password** and click **play**. The default login details are mentioned further in this guide.

5. You have successfully set-up the remote monitoring feature for your surveillance system.
